Professional Summary

Full-Stack Developer and Computer Science student with experience in building responsive web applications, interactive user interfaces, and modern frontend solutions using HTML, CSS, JavaScript, and frontend frameworks. Skilled in UI development, API integration, responsive design, and dashboard systems with hands-on experience in developing real-world applications. Proficient in frontend optimization, modern web technologies, and AI-assisted development workflows while maintaining clean and scalable code. Strong problem-solving, project coordination, and team collaboration abilities with a passion for frontend engineering and emerging technologies.

Technical Skills

Languages	Python, JavaScript, PHP, SQL, R, C#
Frameworks & Libraries	Django, Django REST Framework, Flask, PyTorch, PyTorch Geometric, scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
Machine Learning	Graph Convolutional Networks (GCN), LSTM, Temporal Convolutional Networks (TCN), Transformer, Random Forest, Time Series Forecasting, NLP
Databases	MySQL, Microsoft SQL Server (LocalDB)
Tools	Git, REST APIs, Postman, Jupyter Notebook, Google Colab, Browser Geolocation API
Core Practices	Backend Development, RESTful API Design, Database Design, Authentication Systems, Data Analysis, Deep Learning Pipelines

Education

American International University-Bangladesh (AIUB) <i>Bachelor of Science in Computer Science and Engineering</i>	Dhaka, Bangladesh 2022 – Present
Dhaka City College <i>Higher Secondary Certificate (HSC) – Science</i>	Dhaka, Bangladesh 2018 – 2020
Nabinagar Govt. Pilot High School <i>Secondary School Certificate (SSC) – Science</i>	Nabinagar, Brahmanbaria 2014 – 2018

Projects

Nature's Care – Wellness Brand Website 🌐 <i>HTML/CSS, JavaScript, Netlify</i>	<i>Freelance Client Project</i>
- Designed, developed, and shipped a production website for a women-centered wellness and healing brand. - Delivered bilingual Bangla/English content across programs, courses, blog, and contact sections. - Deployed on Netlify with a responsive, fast-loading editorial design and light/dark support.	
PawsHome – Pet Adoption Platform 🌐 <i>PHP, MySQL, HTML/CSS, JavaScript</i>	<i>Full-Stack (Live)</i>
- Built and deployed a live pet adoption platform with browsable pet profiles, owner listings, and a user dashboard. - Implemented an adoption request workflow with admin review and approval, plus account registration and authentication. - Designed a responsive interface with pet recommendations and contact channels for adopters.	
Lost & Found Management System 🌐 <i>PHP, MySQL, HTML/CSS, JavaScript</i>	<i>Full-Stack</i>
- Developed a role-based lost and found management platform with secure authentication and admin controls. - Developed an automated item matching and notification system using category and location-based filtering. - Implemented image upload, real-time notifications, and administrative dashboard functionalities.	

Event Management System | C#, .NET WinForms, SQL Server (LocalDB), ADO.NET Desktop Application

- Developed a desktop-based event management system with separate user and admin authentication.
- Built request management and notification features with database-driven status updates.
- Designed secure CRUD operations for profile management and event records using parameterized queries and input validation to prevent SQL injection.

FastAID – Emergency Medical Response Platform | PHP, MySQL, JavaScript, Geolocation API Full-Stack

- Engineered a multi-role emergency response platform with role-based dashboards and secure session-based authentication.
- Integrated the Geolocation API for real-time GPS-based emergency tracking and automated responder dispatching.
- Implemented a payment module supporting cards, bank transfers, and mobile banking services.

Stranger Things Themed Interactive Graphics Environment | C++, OpenGL, GLUT, Computer Graphics

- Developed a 2D interactive graphics environment inspired by Stranger Things using OpenGL and GLUT.
- Implemented custom graphics algorithms including the Midpoint Circle Algorithm, procedural object generation, and animation effects.
- Applied 2D transformations, scene rendering, and real-time visual interactions to create a multi-scene graphical application.

OBS Deck – Wireless OBS Studio Controller | ESP32, Bluetooth, Hardware HCI Project

- Designed and built a physical macro deck that wirelessly controls OBS Studio over Bluetooth.
- Implemented tactile controls for recording, streaming, audio capture toggles, scene switching, and screenshots with LED status indicators.
- Engineered the ESP32 circuit, including a lithium battery charging module and a multi-switch button matrix.

Stock Price Prediction using Hybrid GCN-RNN | Python, PyTorch, Pandas, NumPy Research

- Developed a hybrid GCN-RNN model for stock price forecasting using relational and temporal data patterns.
- Built an end-to-end pipeline for financial time-series preprocessing, feature extraction, and graph construction.
- Evaluated model performance and generated analytical visualizations using Matplotlib and Seaborn.

Predictive Intent Modeling for In-Air Micro-Gestures in AR Interfaces | Python, LSTM, TCN Research

- Developed LSTM and TCN-based deep learning models for intent prediction using in-air micro-gesture sequences in AR interfaces.
- Reduced unintended interactions by modeling gesture intent to mitigate the Midas Touch problem in AR environments.
- Performed preprocessing, model training, hyperparameter tuning, and performance evaluation on temporal gesture datasets.

Social Media Advertising Analytics using Machine Learning | Python, Scikit-learn, Pandas, NumPy Research

- Developed and evaluated machine learning models for predicting social media advertising performance.
- Compared Logistic Regression, Decision Tree, KNN, Naive Bayes, Random Forest, and Gradient Boosting models.
- Analyzed campaign engagement using performance metrics including Accuracy, Precision, Recall, F1-Score, and ROC-AUC.

Certifications

IT Essentials

Cisco Networking Academy

Additional Information

Languages: Bangla (Native), English (Fluent), Hindi (Conversational)

Interests: Open Source Contribution, Competitive Programming, Backend Engineering, Machine Learning, Data Science, Software Engineering
